

## Work Progress Report

**Name:** Ishimwe Serge

**Position:** Frontend Developer

**Date:** 10th June 2025

---

## Introduction

This report outlines the progress I made today on the Rent By Aby platform. The main focus was on reworking the “Add House” page — redesigning the flow and interface to improve the user experience for hosts who are listing their properties.

---

## What I Worked On

### Feature: Reworking the House Adding Page

Today, I started rebuilding the house addition process to make it more modern, intuitive, and efficient. This involved both frontend structure and UI design updates aimed at improving how hosts interact with the form.

Here's what I focused on:

- **User Experience Enhancements:** I adjusted the step-by-step flow to make it clearer and easier to follow when filling in house details.
- **UI Redesign:** I began applying a fresh look to the form using updated styles and spacing that match the latest design direction of the platform.
- **Improved Layout:** Components were rearranged to reduce clutter and guide the host through the process smoothly.
- **Better Feedback:** I started working on input hints, form validation visuals, and section highlights that make it easier for users to understand what's required.

The goal with this redesign is to make the process of adding a house feel simple, professional, and enjoyable — especially for new users who may be listing a property for the first time.

### Note:

The redesign is still in progress. I've completed most of the layout and styling work, but I still need to finalize component logic and test it fully before it's ready for release.

---

## Challenges I Faced

- Since this is a full redesign, I had to refactor parts of the original code to fit the new flow and structure.
  - There were a few layout bugs on mobile that I had to adjust to make the form usable on all screen sizes.
  - Making the form both clean and functional required experimenting with different layouts and spacings.
- 

## Summary of Progress

- ✓ Started redesigning the house addition page for hosts.
- ✓ Rebuilt the form layout with a cleaner, modern UI.
- ✓ Improved the user flow to enhance clarity and simplicity.
- ⌚ Final styling and logic are still in progress and will be completed soon.

This update is a key step toward making the Rent By Aby platform more polished and user-friendly. Once finalized, it will help hosts add properties with more confidence and ease.
