

Daily Work Progress Report

Name: Ishimwe Serge
Position: Frontend Developer
Date: 10 October 2025

Introduction

Today, I worked on designing and developing the **Landing Page for Fine Fish**. The goal was to create an attractive, responsive, and modern interface that effectively represents the brand while giving visitors a smooth browsing experience and clear navigation to key sections of the website.

Key Tasks Completed

1.  **Landing Page Design & Layout**
 - Designed a clean, visually appealing layout aligned with Fine Fish's branding.
 - Added hero sections, service highlights, and call-to-action buttons to engage users.
 - Used modern color schemes, typography, and imagery to create a professional look.

2. Responsive Frontend Development

- Developed the landing page using responsive design principles to ensure it looks great on all screen sizes.
- Optimized layouts for mobile, tablet, and desktop viewing.
- Implemented smooth transitions and animations for a more dynamic experience.

3. Performance & Accessibility Enhancements

- Optimized images and assets for faster loading times.
- Ensured accessibility compliance by improving contrast, structure, and navigation.
- Tested across multiple browsers for compatibility and consistent performance.

Summary

The new **Fine Fish Landing Page** provides:

-  **A visually appealing, brand-focused design** that captures user attention.
-  **A fully responsive layout** that adapts to any device or screen size.
-  **Optimized performance and accessibility**, delivering a smooth and professional user experience.

This landing page strengthens Fine Fish's online presence, improving first impressions and guiding users effectively toward engagement or conversion.
