

Work Progress Report

Name: Hirwa Mihigo Honore

Position: Developer

Date: 6th October 2025

Introduction

This report outlines today's development progress on the **Asset Requisition module** within the ABY HR Management System, focusing on the admin approval and rejection functionality.

Task Focus

- Continuing work on the **Asset Requisition module**.
 - Implementing the **admin approval and rejection system** for requisition requests.
-

What Was Done

- Enhanced the backend logic of the **Asset Requisition module** to support admin actions.

- Implemented functionality that allows admins to **approve or reject asset requests** directly.
 - Added proper status updates for each requisition based on admin decisions.
 - Tested workflow to ensure smooth request handling and data accuracy.
-

Current Status

- The **admin approval/rejection functionality** is operational.
 - Further testing and UI adjustments may still be required to refine the workflow.

Next Steps

- Finalize testing of the approval and rejection process.
- Implement notification or feedback system for users after admin action.

- Prepare for frontend integration to display request status updates.

Summary

Today's work focused on extending the **Asset Requisition module** in ABY HR, specifically enabling **admins to review, approve, or reject asset requests**. This functionality strengthens control and transparency in the asset management process, improving overall efficiency and workflow tracking.
