

Group name : Timeless Technologies

1. Project Overview

The **School Management System** is a simple system made to help schools manage their daily activities.

It allows easy **registration of students and staff**, keeps track of **attendance**, helps calculate **student fees**, and supports **online payments**.

2. Main Goals

- Make student and staff registration simple.
 - Help in managing student payments.
 - Allow online payment options.
 - Keep records of attendance for students and teachers.
 - Organize all school information in one place.
-

3. Main Features

A. Student Management

- Register new students with their details (name, class, age, contact).
- Give each student a **unique ID number**.
- Record attendance (Present / Absent).
- Calculate school fees.
- Pay fees online.
- Check payment history.

B. Teacher & Staff Management

- Register teachers and staff with personal details.
- Give each staff member a **unique ID number**.
- Mark attendance.
- Record salary and payments.

C. Payment Management

- Calculate student fees easily.
- Allow online payment through a simple link or button.
- Keep records of all payments.
- Show reports of total income, pending fees, and expenses.

D. Attendance

- Daily attendance for both students and teachers.
- Easy view of present or absent members.
- Attendance summary for each month.

4. How It Works (Simple Steps)

1. **Register Students and Teachers.**
2. System gives each person a unique ID.
3. Record daily attendance.
4. Calculate student fees.

5. Make or record payments.
6. Check reports and balances.

Server and Domain Cost (Per Year)

- **Namecheap** – About \$42 per year

9. Summary

The **School Management System** helps schools run smoothly.
It keeps track of students, teachers, attendance, and payments in one system.
It is simple, useful, and saves time for school management.
