

Work Progress Report

Name: Hirwa Mihigo Honore

Position: Developer

Date: 2nd October 2025

Introduction

This report highlights today's progress on the **Cage module** in ABY HR, focusing on backend improvements and design enhancements for better usability.

Task Focus

- Enhancing **backend functionalities** of the Cage module.
 - Improving the **design of the “View More Details” feature** for better flexibility.
-

What Was Done

- Updated backend logic in the Cage module to ensure smoother functionality and data handling.

- Fixed and optimized certain operations for better performance.
 - Redesigned the **View More Details** interface, making it easier and more flexible for users to check detailed cage information.
 - Ensured consistency in both functionality and design for better user experience.
-

Current Status

- Backend functionalities of the Cage module are now more stable and efficient.
 - The updated design of **View More Details** has improved usability.
 - Additional refinements may be needed after user testing.
-

Next Steps

- Conduct more testing on backend changes to ensure stability.
 - Gather feedback on the **View More Details** design update and refine if necessary.
 - Start preparing documentation for the Cage module updates.
-

Summary

Today's work on the **Cage module** focused on strengthening backend functionalities and redesigning the **View More Details** feature. These updates have improved both system performance and user experience, making it easier to view and manage detailed cage information.
