# 📋 Daily Work Progress Report

**Name:** Ishimwe Serge
**Position:** Frontend Developer
**Date:** 23 September 2025

---

# 📝 Introduction

Today, my focus was on the ABY HR Management System, particularly improving the accuracy of stock handling and enhancing the material issuing process.
The main goals were to ensure **stock movement is tracked correctly** and to enable **attachments when issuing materials**, making the system more reliable and practical for everyday use.

---

# ✅ Key Tasks Completed

1. 🛠️ **Debugging Stock Movement Changes**

   ○ Investigated and fixed issues related to **inconsistencies in stock movement records**.

- ○ Ensured that every action—whether adding, removing, or transferring stock—updates accurately in the system.

- ○ Improved the synchronization logic so that any changes reflect properly across the stock management workflows.

- ○ This guarantees admins have **real-time and correct information** about stock levels and movement history.

2. 🔖 **Enhancing Issued Material with Attachments**

- ○ Added functionality to allow **attachments to be sent along with issued materials**.

- ○ Attachments can include supporting documents such as receipts, approval forms, or delivery notes.

- ○ This addition improves traceability and transparency by keeping all relevant records linked directly to each issued material transaction.

- ○ Made the issuing process **more user-friendly** by allowing admins to manage both the material and its related documentation in one place.

---

# 📚 Summary

The updates to the ABY HR Management System deliver:

- ● **Accurate stock movement tracking**, reducing errors and ensuring full reliability when stock levels change.

- ● **Better documentation in material issuing**, since attachments can now be included to provide proof or references.
